# SAR Assignment Reflection

- How/why did you pick your target?
- Was it easy to figure out how to send request?
- Were they (un)responsive?
- Was the format of the response data useful?
- What'd you conclude about what they hold on you?
- Would you do it again?
- What else?
- How might we make this better for next year's student?

# Assignments #2 & #3 Reflection

- How/why did you pick the device for #2?
- How/why did you pick the service for #3?
- Did you have enough information before you started?
  - If not, where/how did you get more?
- What did you conclude?
- Will you change any future behaviour based on this?
- What else?
- How might we make these better for next year's student?
- General comments on the entire module also welcome!
